## DETAILED ACTION

### *Response to Arguments*

1. Applicant's request for reconsideration of the finality of the rejection of the last Office action is persuasive and, therefore, the finality of that action is withdrawn. Finality of Office action was improper.

### ***Claim Rejections - 35 USC § 103***

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-3 are rejected under 35 U.S.C. 103(a) as being unpatentable over Rudolph 5265595 in further view of Dyrud et al. 5819731.
4. Rudolph teaches a mask having an improved means for being secured over the nose and the mouth of a patient, the improvement comprising: a pair of elastic bands (col. 7; lines 28-29), both ends of the each pair affixed at points of attachment 12 to each of both sides of the mask (fig. 1), adjustably securable to the patient by pulling the ends anteriorly through the points of attachment (col. 7; lines 18-29), and wherein the elastic bands are affixed at four separate points on the mask (fig. 4). It should be noted that Rudolph fails to teach wherein the bands are extendible to loop over and around each ear of the patient.
5. Dyrud et al. teaches a mask with common strap for looping around the ear of patient for securing a mask. Therefore it would have been obvious to one of ordinary

Art Unit: 3761

skill in the art to modify the mask of Rudolph to include the strap of Dyrud et al. to prevent entanglement of the wearer's hair or otherwise ruin the wearer's hair style.

6. The recitation "an oxygen mask" has not been given patentable weight because the recitation occurs in the preamble. A preamble is generally not accorded any patentable weight where it merely recites the purpose of a process or the intended use of a structure, and where the body of the claim does not depend on the preamble for completeness but, instead, the process steps or structural limitations are able to stand alone. See *In re Hirao*, 535 F.2d 67, 190 USPQ 15 (CCPA 1976) and *Kropa v. Robie*, 187 F.2d 150, 152, 88 USPQ 478, 481 (CCPA 1951). The device of Rudolph/Dyrud is fully capable of performing the claimed limitations, because the invention is directed towards means for securing.

7. As to claim 3, Rudolph/Dyrud teach wherein the elastic bands are affixed at two separate points on the mask (34 or 36).
